WHO I AM

I am a freelance web developer with 5 years of experience. I help companies and startups build custom web applications, from product idea to production, handling software development end-to-end.

I integrate quickly into existing teams and work independently on tasks and features. I communicate clearly, document my work, and stay focused on quality, performance, and scalability.

Why work with me

Seriousness and reliability are core to the way I work. My goal as a developer is to complete every task with clean, testable, maintainable, and pixel-perfect code.

SERVICES OFFERED

- Frontend and backend web development
- UI/UX design
- Deploy, testing, pipelines, and automation
- Development of web applications, MVPs, SaaS, e-commerce, blogs
- Evolution and maintenance of existing products
- Integration with systems, APIs, and external services

TECHNOLOGIES

- **Frontend:** React, Next.js, Angular, TypeScript, JavaScript, HTML, CSS, UI frameworks, third-party libraries
- **Backend:** Node.js, Nest.js, Fastify, Express, REST APIs, PostgreSQL, MongoDB, MySQL, Supabase, Redis
- **Cloud & DevOps:** AWS (EC2, S3, CloudFront, ECS, ECR, RDS, Lambda), hosting and domain management, Docker, Vercel, Nginx, PM2, GitHub Actions, CI/CD, Git, GitFlow

EXPERIENCE

Over the past 5 years, I have worked on enterprise projects in the banking, insurance, telecommunications, and energy sectors, as well as supporting smaller clients with landing pages, e-commerce, blogs, and MVPs. I have developed complex dashboards, management platforms, user interfaces, and backend services as a full-stack developer. I handled API integrations, data modeling, authentication, performance optimization, and deployment processes.

COLLABORATION MODELS

- **Time & Material:** daily rate, full-time
- **Fixed project:** defined budget, ideal for projects with clear requirements
- **Monthly retainer:** ongoing support or integration into the team
